PART II

POLICIES AND PROCEDURES
for
AUTISM SPECTRUM DISORDER (ASD) SERVICES

GEORGIA DEPARTMENT OF COMMUNITY HEALTH

DIVISION of MEDICAL ASSISTANCE PLANS

Version Date: October 1, 2024

TABLE OF CONTENTS

Policy Revision Record
[from 2024 to Current[1]

REVISION DATE	SECTION	REVISION DESCRIPTION	REVISION TYPE	CITATION
			A=Added **D**=Deleted **M**=Modified	(Revision required by Regulation, Legislation, etc.)
07/2024	Section 601.1.2	Added guidance related to provider location	A	
07/2024	Section 602.2	Added guidance related to provider location when rendering services	A	
07/2024	Section 601.3	Clarified the difference between "supervision" and "direction"	A	
07/2024	Appendix A – Location Code	Added verbiage: provider must be in Georgia or within 50 miles of the border for "Telemed"	A	
07/2024	Appendix F	Added "***Electronic Signatures: Refer to section 602.3"*** under BCBA signature	A	
07/2024	Appendix G	Increased provider's PA submission ability from 60 days to 90 days of the effective treatment date	M	
07/2024	Appendix F	Added verbiage prohibiting the concurrent billing of 97154/97158	A	
07/2024	Appendix G	Added Section H - PA Submission User Manuals	A	
07/2024	602.2 and Appendix A-Location Code	Removed reference to provider location as it relates to telehealth	D	
07/2024	Appendix A	Added verbiage referring providers to the Telemedicine Guidance policy manual	A	
10/2024	Appendices B, C, and D	Consolidated to Appendix B	M	
10/2024	Appendices E, F, and G	Renamed to C, D, and E respectively	M	
10/2024	Appendix D	Added "If yes, please provide the school schedule" after the question "Is this member currently enrolled in school"?	A	
10/2024	Section 701.1.1	Added General Eligibility requirement as a reminder: *The member's Medicaid benefits must be active on the date of service. As outlined in Section 107.1 of the Part I Policies and Procedures for Medicaid/Peachcare for Kids manual, "It is the responsibility of the provider to verify Medicaid/PeachCare for Kids eligibility on each date of service".*	A	
10/2024	601.1.2	Revised to "physically reside and practice" as it	M	

		relates to the location requirements for providers to enroll		
10/2024	Appendix E(B)(vii)	Added a third option for preventing overlapping PAs; withdrawing. Revised verbiage in #2, End-dating PAs	M	
10/2024	Appendix E(B)(vi)	Updated verbiage related to submitting PA 90 days in advance.	M	

[1] The revisions outlined in this Table are from July 2024 to current. For revisions prior to 2024, please see prior versions of the policy.

Autism Spectrum Disorder Services
Chapter 600: Special Conditions of Participation

601. Conditions

In addition to the conditions for participation outlined in Part I, Autism Spectrum Disorder (ASD) Providers must:

601.1. Credentials

Hold either a current and valid license to practice Medicine in Georgia, hold a current and valid license as a psychologist as required under Georgia Code Chapter 39 as amended, or hold a current and valid Applied Behavior Analysis (ABA) Certification.

601.1.1. Applied Behavior Analysis (ABA) Certification

In addition to licensed Medicaid enrolled Physicians and Psychologists, Georgia Medicaid will enroll Board Certified Behavioral Analysts (BCBAs) as Qualified Health Care Professionals (QHCPs) to provide ASD treatment services. The BCBA must have a graduate-level certification in behavior analysis. Providers who are certified at the BCBA level are independent practitioners who provide behavior-analytic services. In addition, BCBAs supervise the work of Board-Certified Assistant Behavior Analysts (BCaBAs) and Registered Behavior Technicians (RBTs) who implement behavior-analytic interventions.

The following providers are authorized to directly deliver ASD services:

601.1.1.1. Licensed Physician (with or without BCBA certification):

601.1.1.1.1. May be the enrolled QHCP.

601.1.1.1.2. May supervise the work of BCaBAs and RBTs who implement behavior-analytic interventions.

601.1.1.2. Advance Nurse Practitioner (with or without BCBA certification):

601.1.1.2.1. May be the enrolled QHCP.

601.1.1.2.2. May supervise the work of BCaBAs and RBTs who implement behavior-analytic interventions.

601.1.1.3. Licensed Psychologist (with or without BCBA certification):

601.1.1.3.1. May be the enrolled QHCP.

601.1.1.3.2. May supervise the work of BCaBAs and RBTs who implement behavior-analytic interventions.

601.1.1.4. Board Certified Behavior Analyst- Doctoral Level (BCBA-D):

601.1.1.4.1. A doctoral level independent practitioner qualified to provide behavior-analytic services/ direct services.

601.1.1.4.2. May be the enrolled QHCP.

601.1.1.4.3. May supervise BCaBAs, RBTs and others who implement behavior-analytic interventions

601.1.1.5. Board Certified Behavior Analyst (BCBA)

601.1.1.5.1. A masters/graduate level independent practitioner qualified to provide behavior-analytic services/direct services.

601.1.1.5.2. May be the enrolled QHCP.

601.1.1.5.3. May supervise the work of BCaBAs and RBTs who implement behavior-analytic interventions.

601.1.1.6. Board Certified Assistant Behavior Analyst (BCaBA):

601.1.1.6.1. Bachelor's level practitioner - May not be the enrolled QHCP.

601.1.1.6.2. Must be supervised by a physician, psychologist, or BCBA/BCBA-D

601.1.1.6.3. May supervise the work of RBTs.

601.1.1.7. Registered Behavior Technician (RBT):

601.1.1.7.1. Paraprofessional who implements the service plan under supervision of a BCBA/BCBA-D

601.1.1.7.2. May not be the enrolled QHCP.

601.1.1.7.3. Must be supervised by a BCBA/BCBA-D or BCaBA

601.1.2. Enrollment

Individual practitioners (physicians, psychologists, BCBAs-D, BCBAs) will need to enroll as a provider associated with the facility they are providing services through. BCaBAs and RBTs are not enrolled directly by the Division as providers because they are not considered independent practitioners. Level 4 and 5 practitioners work under the supervision of higher-level practitioners. Providers are required to bill at the appropriate practitioner level and service code for service rendered. To enroll as a Medicaid provider, the provider **must** either physically reside and practice **in** Georgia or **within 50 miles** of the Georgia border.

601.2. Standard Billing Practices

The provider agrees to bill the Division the lowest price regularly and routinely offered to any segment of the general public for the same service or item on the same date(s) of service or the lowest price charged to other third-party payers for the procedure code most closely reflecting the service rendered.

Agree to bill the Division for only those services rendered by the provider or by a Qualified Health Professional under the provider direct supervision. Please see O.C.G.A. Title 43, Chapter 11 for statutes regarding direct supervision. Under no circumstances may a provider bill for services rendered by another practitioner who is enrolled or eligible to enroll as a provider of services in the Medical Assistance program.

601.3. Direct Supervision

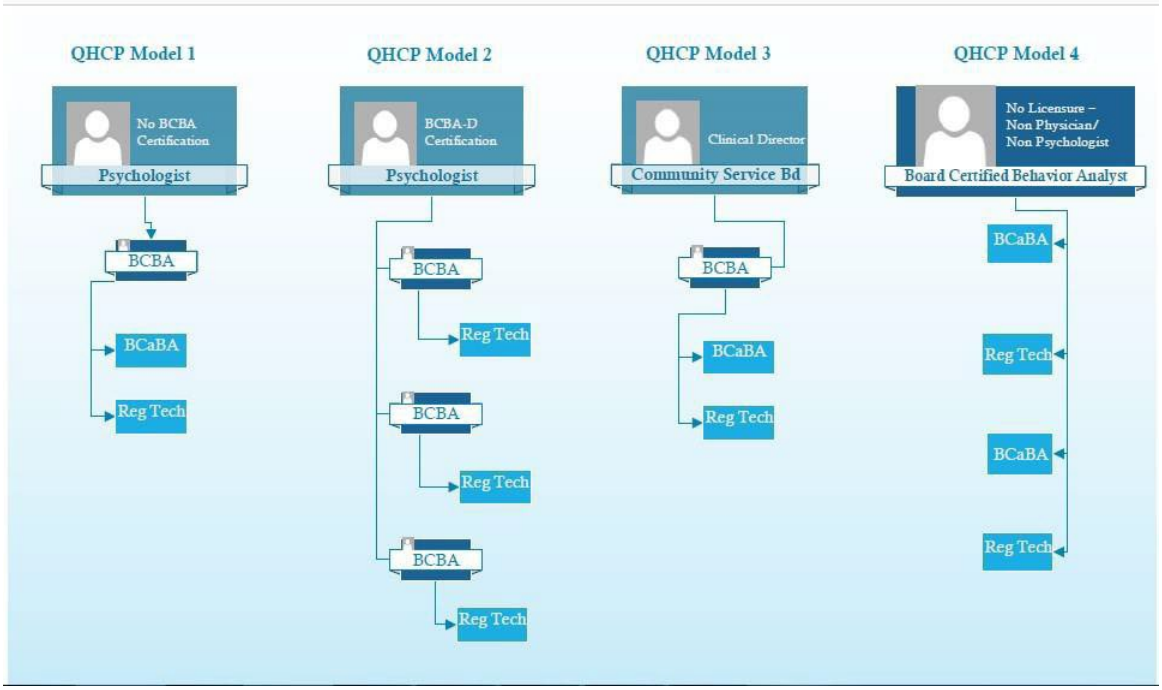
"Supervision" means the direct clinical review, for the purpose of training or teaching, by a physician, psychiatrist, BCBA-D, or BCBA. The purpose of supervision is to promote the development of the practitioner's clinical skills. Supervision may include, without being limited to, the review of case presentations, audiotapes, videotapes, and direct observation of the practitioner's clinical skills. Supervision does not require the supervisor to be present at the work site with the supervisee. Both supervisors and supervisees are required to maintain a contemporaneous record of the date, duration, type, and brief summary of the pertinent activity for each supervision session to be submitted for auditing upon request.

The Qualified Health Care Provider (QHCP) must supervise non-enrolled practitioners who are involved in the delivery of Adaptive Behavioral Services (ABS) to Medicaid members with ASD and for which such services are being claimed to Medicaid under the enrolled provider identification number of the QHCP and/or facility. However, such supervision must be performed in accordance with the supervision guidelines of the Behavior Analyst Certification Board and this policy manual. **Please note that "supervision" is <u>not</u> separately reimbursable as it is built into the direct service codes rates; however, "direction" may be separately reimbursable.**

601.3.1. Direction

Direction of a technician includes, but is not limited to, the QHP observing the technician implementing the patient's protocols with the patient and providing instructions and corrective feedback as needed and/or demonstrating correct implementation of a new or modified treatment protocol with the patient while the technician observes followed by the technician implementing the protocol with the patient while the QHP observes and provides feedback. This service should be reported and billed using code 97155 (adaptive behavior treatment with protocol modification administered by physician or other qualified health care professional). The technician's time is separately reportable under 97153 (adaptive behavior treatment by protocol administered by technician under the direction of a physician or other qualified health care professional). **Time reported and billed must be face-to-face time with the patient.**

There are several potential models for enrollment and supervision. The exhibit below demonstrates example supervision models. The examples are not intended to reflect the full scope of all potential models.



Delegation by QHCP:

601.3.2. The QHCP is responsible for the delegated work performed by any supervisees.

601.3.3. The QHCP shall not delegate professional responsibilities to a person who is not qualified to provide such services. Physicians, Psychologists, BCBA-Ds, and BCBAs may delegate to the supervisee, with the appropriate level of supervision, only those responsibilities within the scope of practice.

601.3.4. The QHCP must have completed education and training, including training on supervision rules and professional ethics as outlined by applicable administrative practice acts, standards of practice, or certification guidelines, to perform the delegated functions.

601.3.5. The QHCP is responsible for determining the competency of the supervisee and will not assign or allow the supervisee to undertake tasks beyond the scope of the supervisee's training and/or competency. The QHCP is also responsible for providing the supervisee with specific instructions regarding the limits of the supervisee's role.

601.3.6. The supervisee may be an employee or independent contractor of the QHCP. If not directly employed, the contract with the QHCP must maintain compliance with the Department's policies in the delivery of ABS, including Medicaid enrollment requirements.

602. Standard Billing Practices

In addition to the conditions for participation outlined in Part I, Autism Spectrum Disorder Providers must bill according to the following practices:

602.1. Provider Changes

Agree to immediately notify the Division's Provider Enrollment Unit via the GAMMIS web portal should any change in enrollment status occur such as: new address or telephone number; additional practice or office locations; change in payee; close of any individual practice; dissolution of a group practice causing any change in the Division's records; change in staffing; and voluntary termination from the Medical Assistance program. Each notice of change must include the date on which the change is to become effective.

602.2. Rendered Services

Agree to bill the Division the procedure code(s) which best describes the service rendered and not to bill under separate procedure codes for services which are included under a single procedure code.

602.3. Record Documentation

It is the responsibility of all Georgia DCH enrolled providers to ensure the health records of Medicaid members are documented accurately and maintained in compliance with both state, federal and national laws. Providers are responsible for being aware of record keeping requirements as outlined by the Centers for Medicare & Medicaid Services (CMS), Georgia DCH, other program affiliated associations and Health Insurance Portability and Accountability Act (HIPAA) guidelines. The Georgia DCH recommends the following record keeping guidelines. These recommendations should be considered basic - a minimum standard for each provider's practice. It is not inclusive of all recordkeeping requirements and providers will be responsible for any additional documentation requested in the event of audits. Records should include:

602.3.1. A complete medical file on each patient containing sufficient information to validate the diagnosis and to establish the basis upon which treatment is given.

602.3.2. A care plan that includes clear and specific coordination with all providers involved in the treatment of the individual. It should include (but not be limited to) individualized expectations, prescribed services, service frequency, scope and duration and goals to be achieved.

602.3.3. Progress notes that are legible, detailed, complete, signed and dated.

602.3.4. All documentation requiring signatures must be legible, original and belong to the person creating the signature. If illegible, the name should be printed as well as signed. All signatures must be dated the actual date signed. Rubber stamp signatures are not acceptable. Electronic signatures are acceptable in certain circumstances. See Part I Policies and Procedures for Medicaid/Peachcare for Kids, Section 106, General Conditions of Participation.

602.3.5. If corrections are needed, they should be made by striking one line through the error, writing the correction, and including the initials of the person making the correction along with the date the correction is made. Whiteout cannot be used for corrections.

602.3.6. Records should be documented in 'real time' and should not be back-dated.

602.3.7. At a minimum, member records should include but not be limited to the following:

602.3.7.1. Individual's name and/or other information related to their identification (SS#, Medicaid ID, etc…)

602.3.7.2. Date and time of admission

602.3.7.3. Admitting Diagnosis

602.3.7.4. Verified Diagnosis

602.3.7.5. The name, address, and telephone number of the responsible party to contact in an Emergency

602.3.7.6. Appropriate authorizations and consents for medical procedures

602.3.7.7. Medical necessity of the service being provided

602.3.7.8. Results of testing and/or assessments

602.3.7.9. Records or reports from previous or current providers including previous assessments

602.3.7.10. Documented correlation between assessed need and care plan

602.3.7.11. Documentation of treatment that supports billing

602.3.7.12. Financial and insurance information

602.3.7.13. Pertinent medical information

602.3.7.14. Physicians' progress notes

602.3.7.15. Nurses' notes

602.3.7.16. Practitioner and case management notes

602.3.7.17. Clear evidence that the services billed are the services provided

602.3.7.18. Treatment and medication orders

602.3.7.19. Date and time of discharge or death

602.3.7.20. Condition on discharge

602.4. Record Maintenance

Maintain copies of submitted claims, clinical documentation, and all corresponding supporting materials for a minimum of five (5) years from the date(s) the service(s) is provided.

602.5. Locum Tenens

Locum Tenens is a long-standing and widespread practice for a provider to retain a substitute provider to take over his/her professional practice when the regular provider is absent for reasons such as illness, pregnancy, vacation, or continuing provider education. The regular provider will be able to bill and receive payment for the substitute provider as though he or she performed the services himself/herself. The substitute provider is generally called 'locum tenens' provider. A member's regular provider may submit a claim and receive payment for services (including emergency visits and related services) of a locum tenens provider who is not an employee of the regular provider and whose services for members of the regular provider are not restricted to the regular provider's offices, if:

602.5.1. The regular provider is unavailable to provide the visit services.

602.5.2. The Medicaid Member has arranged or seeks to receive the services from the regular provider.

602.5.3. The regular provider pays the locum tenens for his or her services on a per diem or similar fee-for-time basis.

602.5.4. The substitute provider does not provide services to Medicaid members for a period of time not to exceed sixty continuous days.

602.5.5. The covering provider must be an enrolled Medicaid provider.

602.5.6. The locum tenens should have a valid Medicaid number in the State of Georgia.

602.5.7. Reimbursements will be for services which the regular provider (or group) is entitled to submit.

602.5.8. A provider or other person who falsely certifies any of the above requirements may be subject to possible civil and criminal penalties for fraud.

602.5.9. The common practice of one provider covering for another will not be construed as a violation of this section. The service furnished by the covering provider is an informal reciprocal arrangement. Providers should be aware that the services furnished by the substitute provider should be identified in the Member's medical record held by the regular provider, which is available for inspection.

NOTE: Autism Spectrum Disorder Services do not include educational services otherwise available through a program funded under 20 USC Chapter 3, section 1400 of the Individuals with Disabilities Education Act (IDEA). Congress reauthorized the IDEA in 2004 and most recently amended the IDEA through Public Law 114-95, The Every Student Succeeds Act, in December 2015. Information about the IDEA Act is found on the U.S. Department of Education site at: Individuals with Disabilities Education Act (IDEA)

Chapter 700: Special Eligibility Conditions

701. Special Eligibility Conditions

Services to treat Autism Spectrum Disorders (ASD), as defined in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders, include assessment and treatment provided to Medicaid beneficiaries in accordance with the Early and Periodic Screening, Diagnostic and Treatment (EPSDT) Benefit and according to medical necessity. Pursuant to 42 CFR 440.130(c), services must be recommended by a licensed physician or other licensed practitioner of the healing arts acting within their scope of practice under state law to prevent the progression of ASD, prolong life, and promote the physical and mental health of the individual.

701.1. General Eligibility

701.1.1. The member's Medicaid benefits must be active ***on*** the date of service. As outlined in Section 107.1 of the Part I Policies and Procedures for Medicaid/Peachcare for Kids manual, "It is the responsibility of the provider to verify Medicaid/PeachCare for Kids eligibility on each date of service". (Rev. 10/2024)

701.1.2. Autism Spectrum Services are for individuals under the age of 21.

701.1.3. Children must be able to participate in sessions.

701.1.4. The member must exhibit behaviors that present as clinically significant health or safety risks to self or others or are behaviors that are significantly interfering with basic selfcare, communication, or social skills.

701.1.5. Members/Caregivers must be able to participate in ABS therapy and have the ability to implement ABS techniques in the home environment as instructed by their behavior analyst. If they are unwilling/unable to implement therapeutic interventions in the home, consideration will be given to other modalities of treatment as ABS needs to be consistently applied in all environments to be successful. Use of ABS in no way precludes other treatment inventions with ABS such as PT, OT, and other forms of behavioral therapy, family therapy, and/or medication management.

The diagnosis must be made by a practitioner enabled by the OCGA practice acts to diagnose behavioral health/intellectual/developmental conditions. Diagnosis should be made and confirmed using acceptable evidence-based tools as listed in **Section 801** and **must** include a **minimum** of **1 primary clinician tool and 1 caregiver tool**.

The following must be ruled out as causal reasons for behavior:

701.1.6. Primary hearing deficits

701.1.7. Primary speech disorder

701.1.8. Heavy metal poisoning

701.1.9. The following ICD-10 CM Diagnosis Codes are required for reimbursement of treatment.

ICD 10 CM Code	Description
F84.0	Autistic Disorder
F84.2	Rett's Syndrome
F84.3	Other childhood disintegrative disorders
F84.5	Asperger's Syndrome
F84.8	Other pervasive developmental disorders
F84.9	Pervasive developmental disorder, unspecified

Chapter 800: Prior Approval

801. Prior Approval for Adaptive Behavior Services (ABS)

Prior Authorization (PA) is required for all Medicaid-covered ABS. Services without a PA will not be covered. Services are authorized in two parts, 1) Behavioral Assessment, and 2) Treatment Services. A Behavioral Assessment is the administration of an industry-standard assessment tool for skill acquisition and/or behavior reduction and is required to substantiate future treatment services. Treatment Services require a Plan of Care (POC) that incorporates the results of the behavioral assessment, individualized goals based on the results, transition and discharge plans, and information on coordination with other providers, as appropriate. Behavioral Assessment prior authorizations may be requested in 3-month increments and Treatment prior authorizations may be requested in 6-month increments. Initial Behavioral Assessments and Reassessments may be completed one time during the 6-month treatment authorization period (no more than 2 months prior to the effective date of the next treatment authorization).

All ABS PAs must be requested by the enrolled QHCP.

A documented diagnosis of ASD must be established by a licensed physician or psychologist, or other licensed professional as designated by the Medical Composite Board prior to completing a PA for Behavioral Assessment or Treatment Services. As stated in 701, the diagnostic evaluation must use valid and reliable evaluation tools that conform to industry standards and include direct observation, parent/caregiver interviews, and standardized tools for the diagnosis of autism.
The diagnostic evaluation should be comprehensive with multiple informants, when possible, and cover multiple domains. The results of the evaluation should be submitted in a report format that contains a summary of each individual evaluation instrument, the developmental history, and presenting concerns. Test forms alone are not acceptable.

The evaluation should meet the following:

801.1. Summary of each individual assessment.

801.2. Include the date it was completed and include the tests administered with scores.

801.3. Include the evaluator's signature, name, and credentials.

In general, two measures are required as multi-modal, multi-informant assessments are empirically supported. The following tools were selected due to meeting the following criteria:

801.4. Standardized assessment tools specifically utilized to assess ASD or the specific core characteristics present in individuals with ASD

801.5. Robust empirical support for the individual's age

801.6. Includes diagnostic validity and reliability for this purpose

801.7. Minimum of two (2) assessment tools (1 primary clinician tool and 1 caregiver tool) from the following table:

801.7.1. Approved Assessment Tools

Primary Clinician Tool	**Other tools needed:**
ADOS2 (Autism Diagnostic Observation Schedule) 12 months through adulthood	Parent input via formal tool (screener, rating scale, or clinical interview)
GARS-3 (by clinician) (Gilliam Autism Rating Scale) 3 - 22 years	Parent input via formal tool (screener, rating scale, or clinical interview)
CARS2 ST/HF (Childhood Autism Rating Scale) 2 years and up	Parent input via formal tool (screener, rating scale, or clinical interview)
STAT (Screening Tool for Autism in Toddlers and Young Children) 24 – 35 months	Parent input via formal tool (screener, rating scale, or clinical interview)
CSBS (Communication and Symbolic Behavior Scales) 6-24 months	Parent input via formal tool (screener, rating scale, or clinical interview)
TELE-ASD-PEDS Children under 3 years	Parent input via formal tool (screener, rating scale, or clinical interview)
NODA (Naturalistic Observational Diagnostic Assessment) 18 months – 6 years	Parent input via formal tool (screener, rating scale, or clinical interview)
DISCO (Diagnostic Interview for Social and Communication Disorders) any age	Parent input via formal tool (screener, rating scale, or clinical interview) – the DISCO can be used as a parent interview and/or clinical observation tool
Rapid Interactive Screening Test for Autism in Toddlers (RITA-T) 18 – 36 months	Parent input via formal tool (screener, rating scale, or clinical interview)
Autism Detection in Early Childhood (ADEC) children under 3 years	Parent input via formal tool (screener, rating scale, or clinical interview)
EarliPoint	Parent input via formal tool (screener, rating scale, or clinical interview)
Canvas DX	Parent input via formal tool (screener, rating scale, or clinical interview)
Caregiver Tool	**Other tools needed:**
Accepted ASD specific Caregiver tools:	
ADI-R (Autism Diagnostic Interview) 2 years and up	Primary Clinician tool

DISCO (Diagnostic Interview for Social and Communication Disorders) any age	Primary Clinician tool
CARS QPC (Childhood Autism Rating Scale – Parent Questionnaire) 2 years and up	Primary Clinician tool (other than CARS)
GARS-3 (Gilliam Autism Rating Scale) 3 – 22 years	Primary Clinician tool (other than GARS)
SCQ (Social Communication Questionnaire) 4 years and up	Primary Clinician tool
MCHAT (Modified Checklist for Autism in Toddlers) 16-30 months	Primary Clinician tool
SRS-2 (Social Responsiveness Scale) 2.5 and up	Primary Clinician tool
ASRS (Autism Spectrum Rating Scale) 2 – 18 years	Primary Clinician tool
Autism Behavior Checklist (ABC) 3 years and older	Primary Clinician tool
Toddler Autism Symptom Inventory (TASI) 12-36 months	Primary Clinician tool
Accepted Non-ASD specific Caregiver tools:	Other tools needed:
BASC (Behavior Assessment System for Children) 2 – 21 years, 11 months	Primary Clinician tool
PDD-BI (PDD-Behavior Inventory) 18 months – 18 years, 5 months	Primary Clinician tool
PEDS:DM (Parents' Evaluation of Developmental Status) birth – 7 years, 11 months	Primary Clinician tool
ASQ-3 (Ages and Stages Questionnaire) 1 - 66 months	Primary Clinician tool
ASQ:SE2 (Ages and Stages Questionnaire: Social Emotional) 6 – 60 months	Primary Clinician tool
CBRS (Conners Behavior Rating Scale) 6 – 18 years	Primary Clinician tool
CDI (Child Development Inventory) 0-6 years	Primary Clinician tool
CSBS DP Infant-Toddler Checklist 6-24 months	Primary Clinician tool

A diagnostic re-evaluation to re-confirm diagnosis may be required if any of the following is indicated in the request:

801.8. Provisional diagnosis of Autism Spectrum Disorders (as defined in the most recent edition of the Diagnostic and Statistical Manual of Mental Disorders).

801.9. No formal neuropsychological evaluation was completed/conducted

801.10. More than 5 years from initial diagnosis and no evidence of ongoing assessment and treatment

The re-evaluation must include, at a minimum, 1 clinician observational assessment.

School psychoeducational assessments are **not** acceptable for diagnostic evaluations.

A PA to perform an initial or follow-up Behavioral Assessment is required to be completed separately from the PA for Treatment Services.

For the purposes of authorizing ABS, Medicaid will accept for submission, the findings from a diagnostic evaluation that was not approved/covered by Medicaid.

802. Behavioral Assessment

A PA is required for the Behavioral Assessment. The Behavioral Assessment is separate from the initial diagnostic evaluation and is used to identify areas of strength and weakness and to develop specific goals for treatment for both the individual and the caregivers involved. The Behavioral Assessment for skill acquisition may include Verbal Behavior Milestones and Assessments Placement Program (VB-MAPP), Assessment of Basic Language and Learning Skills – Revised (ABLLS-R), Assessment of Functional Living Skills (AFLS), Promoting the Emergence of Advanced Knowledge Generalization (PEAK), or Skills assessment.

Behavioral Assessments for maladaptive behavior may include functional behavioral assessments, traditional functional analyses, or Interview-Informed, Synthesized Contingency Analysis (IISCAs).

The results of the Behavioral Assessment should be summarized and used to develop any future interventions in the form of a POC. The POC is a required component of any future requests for Treatment Services.

Behavior analysts, with appropriate consent, should conduct record reviews of all available data (e.g., educational, medical, historical, effectiveness of prior interventions, etc..) at the outset of receiving a member from another facility; however, behavior assessment(s) and treatment plans must be developed by the current provider. A behavior analyst should not submit behavior assessments and treatment plans that are the work product of another behavior analyst to obtain a prior authorization. If a member transfers to another provider within the same company during a period covered under an active PA, the behavior analyst receiving the transferred member must review and attest that the treatment plan has been approved.

The documentation that must be submitted to substantiate the request for an assessment PA should include:

802.1. Diagnostic evaluation

802.2. Letter of Medical Necessity

802.3. Individualized Family Service Plan (if applicable).

802.4. Individual Education Plan (submission of document is optional).

802.5. Previous Hospitalization or out-of-home placement documents (if applicable).

802.6. Medicaid Cover Page (Appendix G)

802.7. Any other clinical documentation needed to support the plan of care as supported by best practices.

803. Treatment Services

A PA is required for ABS Treatment Services. Treatment Services are dictated by the results of a recent Behavioral Assessment and resulting POC. The Behavioral Assessment must have been conducted/dated no more than two (2) months prior to the Treatment PA effective date.
The documentation that must be submitted to substantiate the request for a treatment PA should include:

803.1. Diagnostic evaluation

803.2. Letter of Medical Necessity

803.3. Descriptive results of behavioral assessment as defined in 801.1

803.4. Proposed Plan of Care (POC) –see section 801.2.1 for additional guidance

803.5. Updated data collected during previous treatment authorizations (if not initial request)

803.6. Individualized Family Service Plan (if applicable).

803.7. Individual Education Plan (submission of document is optional).

803.8. Previous Hospitalization or out-of-home placement documents (if applicable).

803.9. Progress Notes (if applicable).

803.10. Medicaid Cover Page (Appendix F)

803.11. Any other clinical documentation needed to support the plan of care as supported by best practices.

Typically, Treatment Services can range from 10 - 30 hours per week but can be more, or less, if medically necessary. Treatment should be commensurate with the member's skill deficit or behavioral excesses as identified in the behavioral assessment. All Treatment Services require active parent/ caregiver participation and involvement to increase the potential for behavior improvement/ changes in those behaviors identified as causing limitations or deficits in functional skills.

PA requests for follow up services (following the initial treatment PA) must include 1) a summary of previous goals and progress, 2) the results of a recent Behavioral Assessment (within 2 months), and 3) individualized goals for the individual and caregivers as described in section 4 (Service Authorization and Dosage) of the practice guidelines for treatment of ASD developed by the Behavior Analyst Certification Board. PAs for re-assessment can be submitted prior to the current treatment PA expiration date.

804. Plan of Care (POC)

The POC should include a clear connection between the results of the behavioral assessment to the specific goals developed for the individual. The goals should highlight areas identified as in need of remediation, with special focus on pivotal, functional skills related to the core deficits of ASD. The goals must include baseline data, measurement, and mastery criteria aim to address the core deficits of ASD as described in the practice guidelines for treatment of ASD set forth by the Behavior Analyst Certification Board (BACB).

Treatment for Autism Spectrum Disorder (ASD) must:

804.1. Demonstrate that ABS are not custodial or maintenance-oriented in nature;

804.2. Include coordination across all providers, supports, and resources;

804.3. Identify parent, guardian, and/or caregiver involvement in prioritizing target behaviors and training in behavioral techniques in order to provide additional supportive interventions;

804.4. Include criteria and specific behavioral goals and interventions for lesser intensity of care and discharge;

804.5. Provide evidence that applicable community resources have been identified and engaged;

804.6. Provide evidence/support for a reasonable expectation that the member can benefit from the services proposed.

School plans will be reviewed for medical necessity; therefore, clinical documentation must be clearly outlined to detail the maladaptive behaviors that the member exhibits that requires the need for intensive support services in the school setting. These plans must include the following:

804.7. Target behaviors that are operationally defined with measurable data regarding the frequency, symptom intensity, duration or other objective measures of baseline and current levels.

804.8. Include the days and times when problem behaviors are occurring at a high frequency, intensity, and duration.

804.9. Outline goals related to behavior reduction and functionally equivalent replacement behaviors that are desirable behaviors that achieve the same outcome or meet the same need as a less desirable problem behavior.

804.10. Titration plan that includes a timeline when behavioral conditions qualify the fading out of school services when criteria for progress are established.

When school services are medically necessary, school plans should be accompanied with a treatment plan for services to also occur in either the home and/or clinic setting as treatment in the school setting is limited to the reduction of problem behavior that impede the member's ability to engage in academic tasks and the teaching of functionally equivalent replacement behaviors. Exceptions to services occurring exclusively in the school environment will be evaluated on an individual basis and must be supported with clinical rationale.

Chapter 900: Scope of Services

901. General

Federal regulations allow the state agency to place appropriate limits on medical necessity and utilization control. The Division has developed reimbursement limitations to ensure appropriate utilization of funds. These limitations consist of (a) prior approval requirements described in Chapter 800, and (b) service limitations described in Section 903.

902. Coding of Claims

Coding of both diagnoses and procedures is required for all claims. Codes deleted from previous editions of the ICD are not accepted by the Division. The ICD-10 CM coding scheme consists of three volumes. Volumes I and II are needed by physicians. ICD-10 codes range that begin with V81.2XXA - Y36.0105 are not accepted by the Division. The remaining special category of codes that begin with "V" or "Z" are acceptable only if the "V" code or "Z" code (ICD-10) describes the primary diagnosis. The provider must select the diagnosis codes that most closely describe the diagnosis of the member. In coding a diagnosis on a claim, the code must be placed on the claim form using the identical format. Coding must be to the highest level.

902.1. General Claims Submission Policy for Ordering, Prescribing, or Referring (OPR) Provider

The Patient Protection and Affordable Care Act (PPACA) requires physicians and other eligible practitioners who order, prescribe, and refer items or services for Medicaid beneficiaries to be enrolled in the Georgia Medicaid Program. CMS expanded the claim editing requirements in § 1833(q) of the Social Security Act and providers definitions in § 1861-r and § 1842(b) (18) C to align with the PPACA. To comply with the PPACA, claims for services that are ordered, prescribed, or referred must indicate the ordering, prescribing, or referring (OPR) practitioner. The Division will utilize an enrolled OPR provider identification number to verify Georgia Medicaid enrollment. Any OPR physician, or other eligible practitioner, who are not enrolled in Medicaid as participating (i.e., billing) providers must enroll separately as OPR Providers. The National Provider Identifier (NPI) of the OPR Provider must be included on the claim submitted by the rendering provider. If the NPI of the OPR Provider denoted on the Georgia Medicaid claim is associated with a provider who is not enrolled in the Georgia Medicaid program, the claim will be denied.

Effective 1 April 2014, the Division will check claims for the NPI of all ordering, prescribing, and referring providers in accordance with the OPR regulation. This edit will be informational until 1 June 2014. Effective 1 June 2014, inclusion of the ordering, prescribing, and referring information will become mandatory. Claims that do not contain the required information will be denied.

1002.1.1. For CMS-1500 claim form: Enter qualifiers to indicate if the claim has an ordering,

prescribing, or referring provider to the left of the dotted line in box 17 (Ordering = DK; Referring = DN or Supervising = DQ).

1002.1.2. For claims entered via the web: Claims headers were updated to accept ordering or referring Provider ID and name for Dental and Institutional claims and the referring provider's name for Professional claims. The claim detail was updated to accept an ordering or referring provider ID and name. Utilize the "ordering" provider field for claims that require a prescribing physician.

1002.1.3. For claims transmitted via EDI: The 837 D, I, and P companion guides were updated to specifically point out the provider loops that capture the rendering, ordering, prescribing, referring and service facility provider information that is now used to transmit OPR information. The following resources are available for more information:

1002.1.3.1. Access the Division's DCH I newsletter and FAQs at: http://dch.georgia.gov/publications

1002.1.3.2. Access the Division's DCH-I newsletter and FAQs at: http://dch.georgia.gov/publications

1002.1.3.3. Search to see if a provider is enrolled at: https://www.mmis.georgia.gov/portal/default.aspx

1002.1.3.4. Choose the 'Provider Enrollment/Provider Contract Status' option.

1002.1.3.5. Enter Provider ID or NPI and provider's last name.

1002.1.3.6. Access a provider listing at: https://www.mmis.georgia.gov/portal/default.aspx

903. Assessment and Service Descriptions: Assessment Descriptions

Service	Assessment Description	Authorized Provider Type
Behavior Identification Assessment	Behavior Identification Assessment is delivered by a Physician or other Authorized Provider Type, face-to-face with the member and caregiver(s). It includes administration of standardized and non-standardized tests, detailed behavioral history, member observation and caregiver interviews, interpretation of test results, discussion of findings and recommendations with the primary guardian(s)/caregiver(s), and preparation of a report for a plan of care.	Physician Psychologist BCBA-D BCBA
Observational Behavioral Follow-up Assessment	Observational Behavioral Follow-up Assessment is designed by the practitioner to identify and evaluate factors that may impede the expression of adaptive behaviors. The assessment utilizes structured observation and/or standardized and non-standardized tests to determine the levels of adaptive behavior. It enables the practitioner to evaluate a member's social behavior to	Physician Psychologist BCBA-D BCBA BCaBA RBT

Service	Assessment Description	Authorized Provider Type
	determine if the member has a particular set of social skills, as well as the contexts in which social responses are either likely or unlikely to occur. Practitioners may assess cooperation, motivation, visual understanding, receptive and expressive language, imitation, request, labeling, play and leisure, and social interactions. Observational Behavioral Follow-up Assessment includes Physician or other Authorized Provider Type direction, with interpretation and report, administered by one of the Authorized Provider Types. The first thirty (30) minutes of the Authorized Provider Type's time, face-to-face with the member. Additional (30) minute increments are authorized in accordance with medical necessity.	
Exposure Behavioral Follow-up Assessment	Exposure Behavioral Follow-up Assessment is designed by the practitioner to manipulate or stage environmental or social contexts in order to examine triggers, events, cues, responses, and consequences associated with maladaptive destructive behavior(s). This service requires the practitioner to provide on-site direction to technicians providing direct service. Exposure behavioral follow-up assessment often requires the use of protective gear and/or padded room to avoid injuries to member and others. Exposure Behavioral Follow-up assessment includes Physicians or other Authorized Provider Type, direction with interpretation and report, administered by Physician or Authorized Provider Type with the assistance of one or more Authorized Provider Type; first thirty (30) minutes of the Authorized Provider Type's, face-to-face with the member. Additional (30) minute increments are authorized in accordance with medical necessity.	Physician Psychologist BCBA-D BCBA BCaBA RBT
Adaptive Behavior Treatment	Adaptive Behavior Treatment addresses the member's specific target problems and treatment goals as defined in assessments. Adaptive behavior treatment is based on principles including analysis and alternation of contextual events and motivating factors, stimulus-consequence strategies and replacement behavior, and monitoring of outcome metrics. Goals of adaptive behavior treatment may include reduction of repetitive and aberrant behavior, and improved communication and social functioning. Adaptive behavior skills tasks are often broken down into small, measurable units, and each skill is practiced repeatedly until the member masters it. Adaptive Behavior Treatment by protocol, administered by Authorized Provider Type, face-to-face with one member; first thirty (30) minutes of the Authorized Provider Type's time. Additional (30) minute increments are authorized in accordance with medical necessity. Adaptive Behavior Treatment can be provided on in an individual, group, family or multi-family setting.	Physician Psychologist BCBA-D BCBA BCaBA RBT

Service	Assessment Description	Authorized Provider Type
Adaptive Behavior Treatment with Protocol Modification	Adaptive Behavior Treatment with Protocol Modification includes skills training delivered to a member who has poor emotional responses and/or deviation in rigid routines. The practitioner introduces small, incremental changes to the members expected routine along one or more stimulus areas. More intrusive changes in routines are faded into preferred daily activities until the member appropriately tolerates typical variation in daily activities without poor emotional responses. The service may include demonstration of new or modified protocol for a technician, guardian, and/or caregiver. The practitioner modifies the past protocol targeted for desired results to incorporate changes in the context and environment. Adaptive Behavior Treatment with protocol modification administered by Physician or other Authorized Provider Type with one patient; first thirty (30) minutes of patient face-to-face time. Additional (30) minute increments are authorized in accordance with medical necessity.	Physician Psychiatrist Psychologist BCBA-D BCBA
Adaptive Behavior Treatment Social Skills Group	Adaptive Behavior Treatment Social Skills Group is administered by a practitioner in a social skills group. The practitioner monitors the needs of the individual and adjusts therapeutic techniques in real-time to address targeted social deficits and problem behaviors using modeling, rehearsing, and corrective feedback. The practitioner develops group activities in which each patient has an opportunity to practice encounters. Adaptive Behavior Treatment Social Skills Group, administered by Physician or other Authorized Provider Type, face-to-face with multiple patients.	Physician Psychologist Psychiatrist BCBA-D BCBA BCaBA RBT
Exposure Adaptive Behavior Treatment with Protocol Modification	Exposure Adaptive Behavior Treatment with Protocol Modification requires staged environmental conditions to train appropriate alternative responses under the environmental contexts that typically evoke problem behavior. Exposure adaptive behavior treatment addresses one or more specific destructive behaviors. Practitioners directs the sequence of events utilizing real time observation. Exposure Adaptive Behavior Treatment with protocol modification requiring two (2) or more Authorized Provider Type for severe maladaptive behavior(s); first sixty (60) minutes of the Authorized Provider Type's time, face to face with member. Additional (30) minute increments are authorized in accordance with medical necessity.	Physician Psychiatrist Psychologist BCBA-D BCBA

903.1. Covered Services by CPT or HCPCs

All services are to be billed with modifiers specific to practitioner level and service delivery setting/modality. See Appendix A for Covered Services Procedure Code and Rate Schedule.

903.2. Medicare Deductible/Coinsurance

If a member is eligible for both Medicaid and Medicare, all claims must be sent to the Medicare carrier first. Medicare upper limits of reimbursement will apply for all services covered by Medicare. Policies and procedures for billing these services and detailed coverage limitations are described in Chapter 300 of Policies and Procedures for Medicaid PeachCare for Kids Part 1 Manual.

Appendix A
2019 Adaptive Behavior Services (ABS) Codes and Rates

Effective January 1, 2019, the Department of Community Health (DCH) and Gainwell Technology updated the Georgia Medicaid Management Information System (GAMMIS) with the 2019 Healthcare Common Procedure Coding System/Current Procedural Terminology (HCPCS/CPT) of new Autism Spectrum Disorder (ASD) procedure codes. The Centers for Medicaid and Medicare Services (CMS) notified State Medicaid Agencies of the revised HCPCS/CPT codes.

Accordingly, some of the HCPCS/CPT codes that were previously assigned to the GA Medicaid Autism program (Category of Service 445) were terminated on December 31, 2018, and the new replacement ASD procedure codes were implemented on January 1, 2019. The new 2019 ABS procedure codes replaced the majority of the T-Codes and also the time-based units of measures were revised. Rates that were associated with the T-Codes were applied and adjusted to the new replacement codes with applicable unit changes.

Below is the listing of the 2019 replacement codes and description of services. Also refer to Appendix F for the crosswalk table that links the new ASD procedures codes to the old Autism T-codes.

Autism Assessment, Therapies and Supports					
2019 Category I/III CPT Codes for Adaptive Behavior Services Description	**2019 Procedure Code**	**Practitioner Level Modifier**	**Service Location**	**Unit**	**Rate**
Behavior identification assessment, administered by a physician or other qualified healthcare professional, each 15 minutes of the physician's or other qualified healthcare profession's time face-to-face with patient and/or guardian(s)/caregiver(s) administering assessments and discussing findings and recommendations, and non-face-to-face analyzing past data, scoring/interpreting the assessment, and preparing the report/treatment plan.	97151	U1	U6	15 mins	58.21

Appendix D
Required Cover Sheet for Documentation Submission For PA

The below form must be printed out and submitted when providers are requesting preauthorization for assessment and treatment hours. Please complete all necessary fields and submit it as instructed.

Member's Name: _____ Member's DOB:_____Gender: M F

Diagnosis:_____ Diagnosed by Whom: _____

Date of Diagnosis:_____ Date of Letter of Medical Necessity:_____

Is this member currently enrolled in school? Y N **(If yes, please provide the school schedule)**

Name of School: _____ School Schedule: _____

Private and/or School related services (Circle service(s) and/or specify "other"):
Occupational Therapy Speech Therapy Physical Therapy Other: _____

Does this member have an IEP or IFSP? (submission of document is **optional**) Y N
(If no, provide rationale for why there is no educational placement. Include family's plan to have the member enrolled in school. Specify school/classroom information).

_____

_____

*Diagnostic Evaluation **Requires** One (1) Clinician Tool **and** One (1) Caregiver Tool from the Acceptable Tools List

Clinician Tool:

___ADOS-2 (Autism Diagnostic Observation Schedule
___GARS-3 (Gilliam Autism Rating Scale)
___CARS 2 ST/HF (Childhood Autism Rating Scale)
___STAT (Screening Tool for Autism
___CSBS (Communication and Symbolic Behavior Scales)
___TELE-ASD-PEDS
___NODA (Naturalistic Observational Diagnostic Assessment)
___DISCO (Diagnostic Interview for Social and Communication Disorders)
___RITA-T (Rapid Interactive Screening Test for Autism in Toddlers
___ADEC (Autism Detection in Early Childhood)
___EarliPoint
___Canvas DX

Caregiver Tool:

___ADI-R (Autism Diagnostic Interview)
___DISCO (Diagnostic Interview for Social and Communication Disorders)
___CARS QPC (Childhood Autism Rating Scale-Parent Questionnaire)
___GARS3 (Gilliam Autism Rating Scale)
___SCQ (Social Communication Questionnaire)
___MCHAT (Modified Childhood Checklist for Autism in Toddlers
___SRS-2 (Social Responsiveness Scale)
___ASRS (Autism Spectrum Rating Scale)
___ABC (Autism Behavior Checklist)
___TASI (Toddler Autism Symptom Inventory)
___BASC (Behavior Assessment System for Children)
___PDD-BI (PDD-Behavior Inventory)
___PEDS-DM (Parents' Evaluation of Developmental Status)
___ASQ-3 (Ages and Stages Questionnaire)
___ASQ:SE2 (Ages and Stages Questionnaire: Social Emotional)
___CBRS (Conners Behavior Rating Scale)
___CDI (Childhood Development Inventory)
___CSBS DP Infant Toddler Checklist

****Authorization Date Range for Behavioral Assessment or Treatment: _____****

Proposed Service Schedule		
Service and Time	Location	People Present
(Example) Direct Service: MWF 2 - 5pm	Home, Clinic	Client, Parent, RBT, BCBA (1x/wk)
(Example): Protocol Modification Wed 2-3pm	Home, Clinic	BCBA, Client
(Example) Parent Training: Every other Wed. from 2 – 3pm	Home	BCBA, Mother, Father

CPT Code:	# of hours/week	# of units/week	# of units/3 mths (13 wks) # of units/6 mths (26 wks)
97151			
97152			
0362T			
97153			
97154*			
97155*			
97156			
97157			
97158*			
0373T			

****Note:*** 97155 is a Protocol Modification code; please see below for guidance on the usage of 97155.
****Note:*** 97154 and 97158 should **not** be billed concurrently. If the behavior analyst is joining a group to provide direction to the technician leading the group, 97154/97155 should be reported together. 97158 is intended for instances where the group session is led by the behavior analyst.

Parent/Caregiver Training Goals: According to the BACB, goals must be specific and include baseline data, behavior that is expected to be demonstrated and mastery criteria, date introduced, date mastered, etc. Parents/caregivers being present during the session is not sufficient for a parent/caregiver training goal. You are required to document and track 2 – 4 goals. Please note that training for school personnel is not reimbursable.
Assessment Results: Summarize findings from the initial and/or most recent behavioral assessment (e.g., FBA, VB-MAPP, etc.). Include visual representations (graphs, tables, grids) as appropriate.
Skill Acquisition Goals: These goals will be related to the core deficits of autism. Goals should be based on assessment performance or data from other providers. Baseline data and progress summary (if goal is in treatment) must be included. Visual representations (graphs, tables, grids) as appropriate.
Behavior Reduction Goals: Graphs are required and must include initial baseline, and graphic display of progress since the intervention was initiated. Interventions over long periods of time should be consolidated to weekly/monthly/etc. units of measurement or otherwise adjusted to be all inclusive of data collected.
Graph Requirements:
All graphs must be legible with the x axis (horizontal) of the line graph labeled with session dates and the y axis (vertical) of the line graph providing the quantifiable measurement of the behavior that was recorded.
The line graph should be in a ratio of 2:3 (i.e., If the y axis is 4 inches, the x axis should be 6 inches).
Condition labels and legends should be utilized when more than one behavior is being graphed.
Maximum number of three (3) behaviors or targets on a single graph.
Graph date format:
The behavior assessment graph should include the member initials as well as the date in a month/day/year format and must have been conducted/dated no more than two (2) months prior to the Treatment Services PA request effective

date.
Baseline data: Baseline is a data measurement that is collected prior to intervention that provides a starting point for comparison. This data must be measurable and indicate the member's present level of responding directly related to treatment plan goals. Phase change lines or other indicators should be used to separate baseline data from intervention data as well as any changes to the intervention and/or varying levels of service.
School Plan: A school plan is required for all educational settings to include both public and private schools with exception only to a daycare or an after-school setting. If ABA therapy is being provided in the school setting, the plan of care must outline a separate school plan that clearly defines the behaviors that are being targeted for reduction specific to this setting, lists behavior reduction goals and include line graphs that meet ASD policy guidelines. Skill acquisition goals should not be implemented in this setting as the primary objective should be reducing maladaptive behaviors that impede the member's ability to engage in academic tasks. Please note that training for school personnel is not reimbursable.
0373T: The request for 0373T units is for severe destructive maladaptive behavior and therefore must be accompanied by the following information: a) Detailed plan on the method in which the additional behavior technician(s) are assisting in the implementation of the behavioral interventions outlined in the treatment plan. b) Environmental configurations that will be in place specific to each behavior that has been targeted for reduction. c) Titration plan that includes the reduction of 0373T units and utilization of 97153 units as the goal should be to transition the member to a less intensive model of intervention. The use of this code must include a BCBA who is onsite and immediately available to join the session.
97155: Protocol modification includes but is not limited to: (a) adjustments to specific components of a protocol (e.g., treatment targets, treatment goals, observation and measurement, reinforcers, reinforcer delivery, prompts, instructions, materials, discriminative stimuli, contextual variables); (b) QHP conducts 1:1 direct treatment to observe patient to determine if the protocol components are functioning effectively for the patient or require adjustments; (c) active direction of a technician while the technician delivers a service to a patient to train the technician to implement a new or modified protocol; (d) QHP implementation of the protocol with the patient to determine if changes are needed to improve patient progress or to test a modified protocol.
If you are performing these actions and documenting these actions, then the code is appropriate for use. Documentation of only supervision or documentation of services being performed at a time when the member is not present would not be appropriate.

B. Checklist: Are the following attached?

i. Diagnostic Evaluation
ii. Letter of Medical Necessity
iii. Plan of Care (Initial Treatment Plan or Progress Report) including the following:
    1. Brief background information including demographics, diagnostic history, medical history, living situation, school information (grade, IEP (optional), services receiving, etc.), previous ABA services, current ABA services, etc.
    2. Current medications
    3. Parent/caregiver concerns
    4. Assessment procedures and results (graphs, tables, grids)
    5. Skill Acquisition Goals including baseline data, mastery criteria, progress summary
    6. Behavior Reduction Goals (if appropriate) including baseline data, operational definition/topography of behavior, treatment strategies, behavior reduction goal, progress summary, graphs
    7. Caregiver Training Goals including baseline data, mastery criteria, etc.
    8. Coordination of Care
    9. Transition Plan
    10. Discharge Criteria
    11. Crisis Plan

Supervising BCBA/BCBA-D Signature: _____

Date: _____
Electronic Signatures: Refer to section 602.3

Appendix E
Alliant Health Solutions - FFS Autism Therapy Services Prior Authorization

A. Overview

Providers may submit a request for Autism Therapy Services and attach supporting documentation via the Medical Review Portal. Go to the Georgia Web Portal at www.mmis.georgia.gov and log in using your assigned username and password. Once a request is submitted, the request data is added to the Alliant Health PA system and is available for review by Alliant Health staff. Once the decision has been rendered, Providers will receive a No-Reply email to notify them that a decision has been rendered. Additionally, should the prior authorization receive a second level review denial decision, the member will receive a notification letter from Alliant Health Solutions.

B. Autism Therapy Request Guidelines and Restrictions

The PA type for Autism Therapy services is AU;

i. Providers must have COS code of 445 and a Specialty Code of 565 or 566;
ii. Only Applied Behavioral Analysis (ABA) procedure codes may be entered on the request;
iii. Providers submit one PA for assessment codes and one PA for treatment codes;
iv. System validation prevents assessment codes and treatment codes to be entered on the same PA;
v. Requests must have an effective/start date equal to or greater than the request date;
vi. All requests may be submitted up to 90 days in advance of the PA start date. The effective date should be set in compliance with DCH standards (i.e., assessment PA requests should have an effective date that is no more than 2 months prior to the effective date of the next treatment authorization);
vii. Overlapping PAs are not allowed. Coordination between the current and new provider is essential for the member's continuity of care. The current provider may:
    1. **Share the member's active PA** information with the new provider; or
    2. **Submit an end-date request (if any billable services were or will be submitted for reimbursement)** via the "contact us" feature located in the PA Portal. The request should indicate the effective end-date which should reflect the last date that billable services were rendered.
    3. **Submit a request to withdraw the PA (if no billable services were or will be rendered)** via the "contact us" feature located in the PA Portal.

Please allow up to 45 calendar days for the PA request to be reviewed and a decision to be rendered. Allow up to 10 calendar days for the reconsideration request to be reviewed and a decision rendered.

Please note that <u>ALL</u> PA's for <u>ALL</u> Medicaid Members <u>MUST</u> be <u>APPROVED</u> prior to services being rendered. Any services rendered without an <u>APPROVED</u> PA or provided prior to the PA Effective date will not be authorized or eligible for reimbursement. Effective dates on existing PA's cannot be made retro or backdated under <u>ANY</u> circumstance or for <u>ANY</u> reason.

C. Autism Therapy PA Submission Instructions

i. Refer to the following User Manuals which are located on GAMMIS at www.mmis.georgia.gov/portal
ii. Select Provider Information
iii. Select Provider Education
iv. Select User Manuals
    1. **FFS Autism User Guide** – this guide provides user instructions for submitting and viewing an Autism PA.

2. **Provider Workspace User Manual** – step by step instructions for utilizing the Web Portal Provider Workspace functionality.

D. Reconsideration Request

From the *Medical Review Portal,* providers may submit a request for reconsideration of the decision rendered on an Autism PA. When a Reconsideration Request is processed, a no-reply email and a 'contact us' message are sent to the provider. The notifications inform the provider that the reconsideration was processed and to check the *Provider Workspace* for details.

E. Reconsideration Request Guidelines

i. Reconsiderations are allowed when the PA has one or more procedure lines that are:

1. **Approved but not for all units requested** - requests must be submitted within **30** calendar days of the decision.
2. **Peer consultant denied** - requests must be submitted within **30** calendar days of the decision. **Please Note:** ***Providers are only permitted to submit one (1) reconsideration following the first peer denial. If the reconsideration results in a second (2nd) peer denial, the provider must*** submit a new PA request.
3. **Tech Denied** but **NOT** Final Tech Denied - requests must be submitted within **10** calendar days of the decision.

ii. Providers are required to attach additional documentation to support the reconsideration request. It is not necessary to re-submit all information sent with the original request but only the information to support the request for reconsideration.

iii. If a technical denial is received, the provider has ten (10) calendar days from the date of the technical denial to electronically attach the missing information. **All missing information must be attached via the reconsideration link at the web portal. If the information is not received within the ten (10) calendar days, the provider will have to re-submit the entire PA request packet.** Instructions for electronically attaching supporting documentation can be accessed via the Georgia Web portal at www.mmis.georgia.gov under the Provider Information tab.

iv. If a request for additional units is denied, the provider has the right to submit a request for "A Reconsideration of the PA Request" within thirty (30) calendar days of peer denial. Only submit the necessary additional documentation supporting the request for reconsideration. There is no need to resubmit all information sent with the original request. Please electronically request a reconsideration review via the web portal and attach your supporting documentation at that time.

v. Reconsideration of PA requests is not appropriate for PAs that have received technical denials. A technical denial means that there are missing documents, and the case cannot be referred to a peer consultant for final determination. If you receive an "initial technical denial", you have ten (10) calendar days to submit the required supporting documentation. If you do not submit within ten (10) calendar days, the PA should be resubmitted with all the required documentation.

F. Change Requests

From the *Medical Review Portal*, providers may submit requests to change information on a PA; and may view change requests already submitted. Change requests are processed by Alliant reviewers and can be approved, denied, or referred. When a Change Request is processed, a no-reply email and a 'contact us' message are sent to the provider. The notifications inform the provider that a change request was processed

and to check the *Medical Review Portal* for details. Providers can view the change request details, including the reviewer's decision comments, by searching for and opening the PA Review Request page.

G. Change Request Guidelines

Providers have the option to submit a "change request" via the web portal requesting a modification to a prior approval request; however, the following criteria must be met:

i. **A significant change in treatment needs** must be documented by submission of an updated and signed LMN/POC uploaded to the web portal. If additional units are requested, a treatment plan addendum that outlines the new goals with baseline data is required.

ii. **For a member whose name and Medicaid ID number have changed** due to an adoption, the change request must also include the new Medicaid ID number. If there have been any paid claims against the PA, GAMMIS will not accept changes made to the PA.

iii. **If a change in modality is requested**, the units to be withdrawn (for substitution) must be specified. This is applicable to PAs for which reconsideration has not been requested.

Effective May 28, 2020, the provider match criteria for Prior Authorization (PA) Type 'AU' (Autism) was removed from the MMIS. This change was completed to allow both affiliated and unaffiliated ASD providers access to all existing ASD PAs for members. Additionally, ASD providers can now render services in accordance with the date range specified not to exceed the maximum approved units. Providers will no longer be required to submit a Change Request via the Medical Review Portal for the remaining services when a member changes providers. To access the existing PA, the new provider will need to obtain the PA information from the provider who requested the PA.

H. PA Submission User Manuals
